

PROFILE

ROZ SPALDING
Spalding Consultancy Ltd

Roz Spalding, Founder and Director of Spalding Consultancy's career has been built around an interest and understanding for health and social care.

In a management career spanning over 20 years Roz has seen the industry change in many ways and believes that all the changes were for the better as care in this country strives to be at the levels it should be and is expected to be.

Having qualified as a Registered Nurse, Roz moved into management and was responsible for a project commissioning the opening of the first Private Partnership Hospital to be built in the grounds of an NHS Hospital.

Roz then undertook a number of different, taxing and personally satisfying appointments, each one developing from the last as her skills in not only care and the immediate management of facilities, but also in areas such as strategic business reviews, implementation of governance systems, setting up of Limited Liability Partnerships and the development of capital development schemes.

As the Manager of several private hospital facilities Roz has experienced the breadth of business within the independent healthcare sector and with it has also learnt that her acute skills can more readily be available and useful to a number of facilities in specific ways.

Roz set up Spalding Consultancy in 2009 and now works with Associates throughout the country providing a highly specialised business consultancy to organisations requiring expertise and guidance in regulation, compliance, problem solving in the Health and Social Care sector and Care Quality Commission. She also advises on the setting up and running of Limited Liability Partnerships.

Roz's specialisation now lies in three separate areas of healthcare and management.

- CQC and Regulatory bodies
- Setting up and management of LLP's and Partnerships
- Healthcare Consultancy and Business management

Roz is also a Mentor for the Prince's Trust, a charity helping young people throughout the UK achieve their aims under difficult circumstances.
